

context : Banking app's fund transfer feature , Generate test cases for transfers between two accounts within the same bank.

Instructions:

Generate fund transfer test cases within same bank

[Mandatory] Generate both positive and negative test cases.

[critical] Generate test cases of P1 and P2 priorities.

[Priority] Generate edge cases as well

[Priority] Generate 15 test cases.

[Priority] Generate Test steps in BDD Given When and Then style and in bullet format

Generate detailed Pre-conditions

Example:

Test no|Description|Test case|Pre-conditions|Test data|Test steps|Expected result|created by|Priority

Persona:

Act as a Senior Tester to design test cases

Output format:

Generate the output in a table format and also a downloadable excel format

Tone:

Professional and specific

Test no	Description	Test case	Pre-conditions	Test data	Test steps	Expected result	created by	Priority
TC_FT_001	Successful transfer between savings and checking accounts within same bank	Verify successful fund transfer between two active accounts owned by the same user	1. User is logged into the mobile banking app. 2. User has an active Savings Account (Acc #1001, Bal: \$5,000) and Checking Account (Acc: #1002, Bal: \$1,000). 3. Daily transfer limit is set to \$10,000.	Source Acc: 1001 Destination Acc: 1002 Amount: \$500.00 Remarks: Rent	* Given user is on the 'Fund Transfer' screen * When user selects Source Account '1001' * And selects Destination Account '1002' * And enters Amount '\$500.00' * And clicks 'Submit' * And authenticates via 2FA/PIN * Then the transaction should be processed	1. Transfer success notification displayed with unique Transaction ID. 2. Source Account balance updated to \$4,500. 3. Destination Account balance updated to \$1,500. 4. Transaction logged in history.	Senior QA	P1
TC_FT_002	Successful transfer to another customer's account within the same bank	Verify fund transfer to another valid internal account holder (intra-bank)	1. Sender account (Acc: #1001, Bal: \$2,000) is active. 2. Beneficiary account (Acc: #2005, Name: John Doe) is registered and active.	Source Acc: 1001 Beneficiary Acc: 2005 Amount: \$250.00	* Given user navigates to 'Intra-Bank Transfer' * When user selects Beneficiary Account '2005' * And enters Amount '\$250.00' * And confirms details on summary screen * And enters valid OTP * Then transfer complete screen should be	1. Confirmation screen displays 'Transfer Successful'. 2. Sender balance reduced to \$1,750. 3. Debit SMS/Email alert triggered to sender.	Senior QA	P1
TC_FT_003	Transfer exactly equal to total available balance	Verify transfer of the full available account balance (zero balance remaining)	1. Source Account (Acc: #1003) has an available balance of exactly \$100.00 (No minimum balance restriction).	Source Acc: 1003 Destination Acc: 1002 Amount: \$100.00	* Given user selects Source Acc: '1003' with \$100 balance * When user inputs Amount '\$100.00' * And submits the transfer * And completes authentication * Then transaction should succeed	1. Transfer succeeds. 2. Source Account balance becomes \$0.00. 3. Account status remains Active.	Senior QA	P2
TC_FT_004	Transfer using maximum allowed daily limit	Verify transfer with amount exactly equal to maximum daily transfer limit	1. Daily transfer limit configured for user: \$10,000. 2. User has transferred \$0.00 today.	Source Acc: 1001 Destination Acc: 2005 Amount: \$10,000.00	* Given daily limit remaining is '\$10,000.00' * When user enters Amount '\$10,000.00' * And confirms transaction with PIN	1. Transaction completes successfully. 2. Remaining daily limit updated to \$0.00.	Senior QA	P2

Confirmation displays 'Transfer Successful'. 2. Sender balance: \$1,750. 3. Debit alert SMS/Email sent to sender.	Senior QA	P1

context :

QA team tracks defects including both In-sprint and regression defects. Create a single page visual dashboard to review the defects.

Instructions:

create a visual dashboard which is a html file that shows the overall defects raised.

[Priority] Defects should be displayed as a pie chart

Create a pie chart on the dashboard that displays total number of defects

Create a pie chart on the dashboard for defects with respect to their status

Create a pie chart on the dashboard for defects with respect to their severity

Create a bar chart that shows number of regression defects and In-Sprint defect

create a bar chart that displays the bugs with respect to assignee

Example:

Bug ID: BUG-1111 Severity:P1 Title:Login Button not working Status:Open Assignee:Vijay

Persona:

Generate- Act as a Frontend QA engineer skilled in building HTML/CSS/JS dashboards

Output format:

one .html file- Summary on the top, chart in the middle, defects table at the bottom

Tone:

[Strict]Professional dashboard
